### 8. Outcomes

Please tell us about the outcomes you expect to result from your project. Outcomes are the changes you expect to occur for the beneficiaries of your project. Generally outcomes can be framed as an increase or decrease in one or more of the following:

- Skills, knowledge, confidence, aspiration, motivation (these are generally immediate or short-term outcomes)

# LSA Grant Application Form

## Form Preview

- Actions, behaviour, change in policy (these are generally intermediate or medium-term outcomes)
- Social, financial, environmental, physical conditions (these are generally long-term outcomes)

Immediate outcomes occur directly following an activity (e.g. within 1 month); medium-term outcomes are those that fall between the short and long-term outcomes (e.g. between 1 month and 2 years); and long-term outcomes are those we expect to see years later (e.g. 2, 5, 10 or 50 years after the activity).

### Your outcome goals Timeframe

### Alignment with our outcome goals

### How does your intended outcome link to our outcome goals?

What changes do you expect will occur as a result of your project (e.g. Enhanced physical fitness)? One per row.	When do you expect this outcome to emerge?	Which of our outcome goals will your project contribute to? If multiple apply pick the most relevant. No more than 1 choice may be selected.	Please explain how your intended outcome helps contribute to ours.

## Your metrics

A metric is a measurement designed to indicate whether or not progress towards an outcome is occurring, and quantify the extent to which it is occurring.

You may add your own metrics here.

There are two types of metrics. An 'Outcome Metric' is a measurement designed to help you determine whether progress towards an outcome is occurring or not, and quantify the extent to which it is occurring. An 'Activity Metric' tells you how much of something you're doing or producing ('outputs' are often Activity Metrics, for example.)

Metrics work best when they:

- Are quantifiable/numeric
- Are clearly defined and succinct
- Contain all the context needed to gauge and compare the result (e.g. unit [e.g. cm, metres, people, people-days, %, etc]; direction of change [increase; decrease; etc.]; timeframe [e.g. per month; per year; etc])
- Have been tested, and/or are in common use, and/or are commonly understood as a relevant and useful indicator of performance in a particular arena
- Are used sparingly - you are much better off to "ask one good question and answer it reliably" than try to track many things at once
- Relate to a clearly articulated outcome or activity.

Metric	Type of metric	Target	Collection method
One per row. Add more rows if you want to list additional metrics.	'Activity metrics' measure an activity (e.g. 'Number of visitors'). 'Outcome metrics' measure the change	Identify a target for the metric you have chosen - an estimated total for your project. Must be a number.	How will you collect and verify the data? E.g. survey, headcount, observation/estimation, externally

	experienced by a population group (e.g. 'Number of young people gaining employment').		verified sources (e.g. government or public datasets).

### Activities

Tell us about the activities you will undertake in order to create change. List one per row.

You can stipulate one location for each activity. If you have one activity taking place in multiple places, you can either list each location as a separate activity (e.g. Breakfast Club #1; Breakfast Club #2, with a specific location attached to each), or you can list one activity with a generalised location (e.g. "Melbourne CBD").

Activity	Location	Will this activity be delivered online?	Start date	End date
One per row. Add more rows if you want to list additional activities.	Where will your activity occur? Any, but at least one field is required.	Pick one option.	Must be a date.	Must be a date.

### Theory of change

A theory of change describes how one activity (or a series of activities), when carried out in a certain way, will or may lead to a particular outcome. A theory of change can be provided in written or diagrammatic form.

By outlining your theory of change - why you believe the activities you carry out will produce the outcomes you seek - you can help us understand why funding the work you do may contribute to producing a social, economic or health change.

Theory of Change	Evidence	Explanatory notes
Please explain why you believe the activities you propose will create a shift towards the outcomes you seek.	Provide evidence (where relevant) of the link between the work you will do and the outcomes you seek.	Add notes if you need to provide more context.

### Summary of Outcomes

**Please confirm which of the following best relates to your project. Select all that apply to your proposal \***

- Increased knowledge

- Educational
- Enhanced decision-making
- Improvements to external services (health care/vocational/disability/rehabilitation)
- Improvements to physical or mental health of those affected by road trauma (treatment/support/care/ability/prevention)
- Social impact (quality of life/relationships/meaningful work)
- Economic impact (cost savings/R&D/cost of living/return to work)
- Other:

At least 1 choice must be selected.
